TOOT SWEET

France increased her unfavorable trade balance by \$1,000,000,000 francs in 1920 compared with 1919. That means that the value of the French franc will soon begin to climb. The new franc will be worth 100 old francs and France took him at his word.

THE MISSOURI JURY

Perhaps the long silence of President Wilson after election was due to his recollection that he called Senator Spencer of Missouri a liar and then said he was willing to leave the issue to the people of Missouri. The overwhelming victory of Spencer in his fight for the senate seat, and the overwhelming defeat of the Wilson candidate for the presidency, might have been a severe jolt to his majesty, the monarch of Democracy.

TAKE THE PLUG—GIMME THE CHAW

It is suggested that ultimately it may be best for the people to keep the tax and let the government have the income. This suggestion comes from the New York World, chief defender of the administration under which present tax conditions arose. As a matter of fact, some of the larger taxpayers would have been better off if the government had taken the income and paid the taxpayers the tax. Strange situation isn't it?

J. B. KEEPS NAGGING

John Bull keeps up his discrimination against American trade. Freight rates from New York to the United Kingdom are fixed by the eastern freight conference at \$1 per 100 pounds on many commodities, while from New York to France and channel ports rates for the same commodities vary from 20 to 50 cents per hundred pounds. From New York to Dutch ports the rate is 50 cents. The American exporters are getting around this by routing shipments of goods to United Kingdom via the continent. Possibly a little taste of maximum and minimum tariff might bring John Bull to his senses. As soon as that is proposed some of our weak waters will accuse us of holding a club over European competitors, ignoring the fact that England is belaboring us with her big stick.

A VICIOUS MEASURE

The assembly joint resolution No. 10, introduced by Miss Averill of Nye county, provides for a 12-year term for justice of the supreme court of this state. This is a vicious measure should meet with over-whelming defeat. Some judges become corrupt during their two, four and six-year terms, and to give them a longer tenure of office would mitigate against the best interests of the people. At this distance it looks as though a frame was being proposed for some certain person who will be a candidate for justice of the supreme court at the next general election. Why not elect the judges for life, or so change the constitution making the office an appointive one by the governor? The resolution should meet with defeat.

RIGHT THROUGH THE MILL

Beginning at the bottom of the ladder was the policy of J. H. Himes when he went into the steel business. He is now a congressman from Pennsylvania. Himes is 36 years old, a college graduate, and a special student of foreign trade conditions. After completing technical training in college, he went to work as a cinder pitman in an open-hearth furnace crew. From that laborious job he worked his way up through all the practical work of a steel mill to a salesmanship position, and then the general management. He traveled in South America for the special purpose of acquiring practical knowledge of conditions which America must meet in order to compete most effectively for trade with that continent. He is a Republican and will occupy a seat heretofore held by a Democrat.

John S. Drum of San Francisco is the new president of the American Bankers' association.

QUITWORK AT HOG ISLAND SHIP YARDS

Philadelphia, Pa., Feb. 12.—Shipbuilding activity at Hog Island, the world's largest shipyard, has ceased. With the delivery of the steamship Asino to the army transport service after the vessel's trial trips during the latter part of January, not a ship remains to be completed at the great plant.

Hog Island, during the three years of its existence, has been one of the chief factors in placing America in the front rank of maritime powers. Created as a war-time emergency, more than 26,000 men and women were employed there at the peak of its operations.

The first keel was laid February 1, 1918, and since then 122 vessels of a total of 956,730 deadweight tons, more than one-tenth of the shipping board emergency fleet corporation's tonnage of contract ships built at all the shipyards in the United States, have been turned out.

The production record of the Hog Island yards reached its height in the one-year period from April 18, 1919, to April 17, 1920, when 79 ships were launched and 74 delivered, an average of one ship launched every 28 working hours and one delivered every 30 working hours.

During the course of their travels over the seven seas these vessels have engaged in 19 rescues of craft disabled in heavy storms; the lives of 702 members of disabled craft crews have been saved and ships worth \$15,000,000 have been brought safely into port by the steamers from Hog Island.

EARTHQUAKES LESS NUMEROUS IN YEAR 1920

WASHINGTON, D. C., Feb. 12.—There were fewer earthquakes in the United States and throughout the world last year than in 1919, but those of a destructive character were more numerous and there also was much more volcanic activity.

Records compiled by Professor Francis A. Tondorf, director of the seismological observatory and head of the department of geology of Georgetown university here, show 93 earthquakes were felt in the United States compared with 97 in 1919, while reports from all parts of the world show 161 quakes were reported as compared with 468 in 1919.

Eleven of the earthquakes last year resulted in destruction of life or property, while in the previous year only seven caused such losses. The most destructive during 1920 were those at Mendoza, Argentina, and the Tepelini district of Italy, both of which occurred in December, and those reported from Mexico City and Vera Cruz, Mexico; Minas Geraes, Brazil; the island of Yap, in the Pacific ocean; Cadiz, Spain; the island of Formosa and the island of Malta, Japan; Pirizano, Italy; Glarre, Italy, and Granada, Spain.

California reported the largest number of earth tremors of any locality in the United States in 1920, with a total of 62, while in 1919 California reported 80.

UNCLE SAM'S TEA PARTY IS HELD IN N. Y.

(By Associated Press)
NEW YORK, Feb. 12.—Uncle Sam's official and annual tea party has just been held here.

Far from the tittering throngs which toll about the peacock alleys of effete hotels and Broadway's dimly lit tearooms each afternoon, seven sturdy men partook of nearly 100 cups of tea in the workaday environment of a government warehouse.

Scores of samples were offered these official connoisseurs. They sniffed, tasted, and then used a magnetic aspirator for a target. They determined whether each specimen had enough or too much theine, sometimes known as a kick. Seven of them composed the United States board of tea experts. One member of the board came from each of the following cities:

New York, Boston, Charleston, San Francisco, Tacoma, Chicago and St. Paul.

Each year they choose eight new men standards, and no tea below the fixed quality, purity or fitness for consumption may be imported.

Tea, they explained, between taste is the superb stimulant. It keeps up the brain without causing a remedial hangover. Swiss guides favor it and Perry drank it exclusively in his final dash for the pole. Furthermore, they said tea is just as healthful now as it was 50 years ago.
